CONTROL OF SUBSTANCES HAZARDOUS TO HEALTH

An interactive training course on Control Of Substances Hazardous to Health including the CLP regulations

This SafetyNet interactive learning course is to help staff understand why **health and safety is so important** and their responsibilities for ensuring the safety of themselves, colleagues and everyone in the workplace.

The course highlights the dangers that staff can face from **exposure to hazardous substances** and the control measures required to reduce this risk which could result in injury and time off work.

The training message is delivered in a positive mode to ensure all trainees are aware of the safety procedures and know where to get information should they be required to handle hazardous substances in the workplace.

The “**safety is a state of mind**” and “**no one works to get hurt**” culture is reinforced throughout the course. The learning design adopted ensures effective engagement of the Learner by continued interaction utilizing screen prompts to guide the trainee through the course and those with little or no computer experience will find it easy to use.

- ➔ A **cost effective** solution to your training and ongoing assessment requirements.
- ➔ **Recorded evidence of training** covering safe working practice and legal compliance.
- ➔ **Measurable** progress and achievement.
- ➔ **Consistent, reinforced** auditable training.

Having completed the tutorial, a random assessment test is generated and the course records the Learner's progress providing an auditable trail of results and a **certificate** of completion can be printed for successful students.

This certificate provides evidence of the underpinning knowledge required prior to completing a workplace assessment to prove competence.

Successful completion may be used to provide evidence for **Accreditation of Prior Learning for S/NVQs**.

My SafetyNet courses...

- Have the course customized to reflect your company's corporate identity, site requirements and company policy.
- Delivery of training can be configured to suit individual company IT requirements.
- Course accreditation can either be in – house or external (e.g. RoSPA, IOSH or CPD) depending on your particular requirements.

A COST EFFECTIVE SOLUTION TO YOUR TRAINING

INTERACTIVE SCENARIOS

Regardless of the subject matter, all of the learning material that we develop is designed to engage, motivate and challenge the learner through the use of interactive screens which help to improve trainees' knowledge retention.

We are now enhancing the learning environment within our courses by adding course specific interactive scenarios that encourage the learner into interactive play further improving the knowledge transfer.

The courses and modules that we create can be used for standalone or as part of a blended learning approach and much of the materials have been designed with both purposes in mind.

Well designed learning materials can be used in many different scenarios, maximising your investments.

Course Modules

Module 1

THE SUBSTANCES

Introduction.
Substances.
Safety Data Sheets.
Labelling.
Checkpoint Quiz.

Module 2

THE ASSESSMENTS

The Assessments.
5 Steps of an Assessment.

REMEMBER...

Assessment.
Checkpoint Quiz.

Company Specific Scenarios

We can also create scenarios for your company to reflect specific hazards and situations relevant to your industry.
