

PPE

PERSONAL PROTECTIVE EQUIPMENT

An interactive training course on **Personal Protective Equipment**.

This SafetyNet interactive learning course is to make staff aware that **personal protective equipment** is a “**last resort**” as a protection against risks to safety and health in the workplace.

The course details **how to choose PPE** that’s suitable for the task, the wearer, and the work environment and is **worn correctly** by someone who has been trained to use it.

The training message is delivered in a positive mode to ensure all trainees are aware of the safety procedures and know where to get information should they be required to.

The “**safety is a state of mind**” and “**no one works to get hurt**” culture is reinforced throughout the course. The learning design adopted ensures effective engagement of the Learner by continued interaction utilizing screen prompts to guide the trainee through the course and those with little or no computer experience will find it easy to use.

- ➔ A **cost effective** solution to your training and ongoing assessment requirements.
- ➔ **Recorded evidence of training** covering safe working practice and legal compliance.
- ➔ **Measurable** progress and achievement.
- ➔ **Consistent, reinforced** auditable training.

Having completed the tutorial, a random assessment test is generated and the course records the Learner’s progress providing an auditable trail of results and a **certificate** of completion can be printed for successful students.

This certificate provides evidence of the underpinning knowledge required prior to completing a workplace assessment to prove competence.

Successful completion may be used to provide evidence for **Accreditation of Prior Learning for S/NVQs**.

My SafetyNet courses...

- Have the course customized to reflect your company’s corporate identity, site requirements and company policy.
- Delivery of training can be configured to suit individual company IT requirements.
- Course accreditation can either be in – house or external (e.g. RoSPA, IOSH or CPD) depending on your particular requirements.

A COST EFFECTIVE SOLUTION TO YOUR TRAINING

INTERACTIVE SCENARIOS

Regardless of the subject matter, all of the learning material that we develop is designed to engage, motivate and challenge the learner through the use of interactive screens which help to improve trainees' knowledge retention.

We are now enhancing the learning environment within our courses by adding course specific interactive scenarios that encourage the learner into interactive play further improving the knowledge transfer.

The courses and modules that we create can be used for standalone or as part of a blended learning approach and much of the materials have been designed with both purposes in mind.

Well designed learning materials can be used in many different scenarios, maximising your investments.

PPE

Course Modules

- Introduction to PPE.
- Choosing PPE.
- Storage of PPE.
- Maintenance of PPE.
- Responsibilities of PPE.
- Signs requiring the use of PPE.
- Checkpoint Quiz.

Company Specific Scenarios

We can also create scenarios for your company to reflect specific hazards and situations relevant to your industry.
