

# Handling & Use of FLAMMABLE LIQUIDS

## An interactive training course on **Handling & Use of Flammable Liquids.**

This SafetyNet interactive learning course promotes a proactive approach towards **Health & Safety** and can be used to help foster and develop this attitude change amongst all staff.

The learning design adopted ensures **effective engagement** of the Learner by continued interaction utilizing screen prompts to guide the trainee through the course and those with little or no computer experience will find it easy to use.

The course highlights the dangers that **fire can cause** and delivers a positive message to encourage the staff to take a pro-active approach towards their responsibilities for ensuring the safety of everyone in the workplace.

The “**safety is a state of mind**” and “**no one works to get hurt**” culture is reinforced throughout the course.

➔ A **cost effective** solution to your training and ongoing assessment requirements.

➔ **Recorded evidence of training** covering safe working practice and legal compliance.

➔ **Measurable** progress and achievement.

➔ **Consistent, reinforced** auditable training.

Having completed the tutorial, a random assessment test is generated and the course records the Learner's progress providing an auditable trail of results and a **certificate** of completion can be printed for successful students.

This certificate provides evidence of the underpinning knowledge required prior to completing a workplace assessment to prove competence.

Successful completion may be used to provide evidence for **Accreditation of Prior Learning for S/NVQs**.

**MAKE YOUR SITE A SAFETY ZONE -  
KEEP IT SAFE AND LEGAL**

## My SafetyNet courses...

- **Have the course customized to reflect your company's corporate identity, site requirements and company policy.**
- **Delivery of training can be configured to suit individual company IT requirements.**
- **Course accreditation can either be in – house or external (e.g. RoSPA, IOSH or CPD) depending on your particular requirements.**

# A COST EFFECTIVE SOLUTION TO YOUR TRAINING

## INTERACTIVE SCENARIOS

Regardless of the subject matter, all of the learning material that we develop is designed to engage, motivate and challenge the learner through the use of interactive screens which help to improve trainees' knowledge retention.

We are now enhancing the learning environment within our courses by adding course specific interactive scenarios that encourage the learner into interactive play further improving the knowledge transfer.

The courses and modules that we create can be used for standalone or as part of a blended learning approach and much of the materials have been designed with both purposes in mind.

Well designed learning materials can be used in many different scenarios, maximising your investments.

## HANDLING & USE OF FLAMMABLE LIQUIDS

### Course Modules

#### Module 1

#### INTRODUCTION

#### Module 2

#### GENERAL CONTROL MEASURES (VICES)

#### Module 3

#### STORAGE IN FIXED TANKS AND CONTAINERS

#### Module 4

#### LOADING AND UNLOADING OF ROAD TANKERS

#### Module 5

#### COATINGS MANUFACTURE

#### Module 6

#### CLEANING PLANT AND EQUIPMENT

#### Module 7

#### MAINTENANCE AND MODIFICATION

#### Module 8

#### SPILLAGES

#### Module 9

#### EMERGENCY

#### Module 10

#### ZONING

#### IGNITION

#### STATIC

## ...training for success

### Other courses in the SafetyNet series:

Working Safely, Health & Safety Awareness, COSHH, Hazard Identification & Risk Assessment, PPE, RPE, Loading & Unloading, Safety in the Office, DSE, Computer Awareness, Manual Handling, Noise & Vibration, Driving Safely, Fire.
